

OLADIMEJI ABUBAKAR

Product Designer | UI/UX Designer

Kwara, Nigeria | oladimejiuiux@gmail.com | <https://www.linkedin.com/in/uiuxoladimeji/> | <https://uxdimeji.com>

CORE SKILLS

User Interface (UI) Design, User Experience (UX) Design, Interaction Design, Visual Design, Design Systems & Component Libraries, Responsive & Mobile-First Design, Figma, FigJam, Wireframing & Prototyping, User Research & Usability Testing, Information Architecture, Accessibility (WCAG), AI Assisted Development.

PROFESSIONAL EXPERIENCE

Product Designer

Elevayt | January 2026 – Present

- Led the design of a **state-level exam registration management system**, enabling centralized oversight and reducing administrative friction for education authorities.
- Designed a **learning management system for Basic 1 – SS3 students**, improving access to structured learning materials and digital education resources.
- Designed a **full teacher management system** used by government stakeholders, school principals, and teachers, supporting recruitment, deployment, performance tracking, and self-service workflows.
- Translated complex government and education policies into **clear, usable digital workflows** tailored for multiple user roles.
- Collaborated closely with engineers, product managers, and ministry stakeholders to align product decisions with technical and policy constraints.
- Built and maintained **scalable design systems** to ensure visual and interaction consistency across multiple GovTech and EdTech platforms.
- Conducted user research with educators and students to inform usability decisions and improve adoption across diverse user groups.

Product Designer

LoopWise | March 2025 – June 2025

- Designed the **mobile experience for shippers and carriers** within a freight logistics platform, supporting real-world operational workflows.
- Simplified complex logistics processes across trucking, air cargo, and shipment tracking into **intuitive booking and monitoring flows**.
- Reduced user friction by restructuring information architecture and improving visibility of shipment status across multiple transport modes.
- Collaborated with engineering teams to ensure designs were technically feasible and optimized for real-time logistics operations.

Contract Product Designer

RoomService | November 2023 – February 2024

- Optimized the **end-to-end food delivery experience**, from discovery through checkout, with a focus on speed and clarity.
- Implemented UX improvements that contributed to **higher conversion and reduced drop-off** during ordering flows.
- Conducted competitive analysis and usability testing to identify friction points and inform design optimizations.
- Delivered polished, production-ready designs aligned with business and growth objectives.

Contract Product Designer

Alta Inc | November 2022 – January 2023

- Worked on a **no-code mobile app builder**, empowering non-technical creators to launch digital products without writing code.
- Translated complex development logic into **simple visual workflows** accessible to non-technical users.
- Designed drag-and-drop components, logic builders, and configuration flows that reduced the learning curve for first-time users.
- Collaborated with product and engineering teams to ensure usability without compromising flexibility.

EDUCATION

Bachelor of Science in Computer Science

Ojaja University | 2024

- First Class Honors
- Relevant Coursework: Human-Computer Interaction, Software Engineering.

PROJECTS & ACHIEVEMENTS

- Applikit** – AI-powered job application assistant that generates tailored resumes, cover letters, and mock interviews from job descriptions, helping job seekers prepare faster and more confidently.
- Figma Plugin** – Built a productivity plugin to automatically match unlinked text layers to local text styles, improving design system consistency.
- Portfolio Website** – Designed and shipped a custom portfolio with advanced interactions and CMS-driven content, showcasing end-to-end product thinking.
